To Halter Technical Customers in the European Union:

Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (recast) (the "RoHS Directive") restricts the use of the hazardous substances in electrical and electronic equipment. The policy of Halter Technical Incorporated ("Halter Technical") is to comply with all applicable laws of all jurisdictions having authority over Halter Technical's business, including the RoHS Directive.

Accordingly, Halter Technical has implemented a rigorous program designed to ensure compliance of its products with the RoHS Directive. Halter Technical's program includes the following measures, among others, as we have deemed appropriate:

- Performing material content testing
- Where relevant to Halter Technical's products, seeking confirmation from our suppliers as to compliance of their parts and other materials with the RoHS Directive
- Introducing new compliant materials to replace non-compliant materials
- Maintaining inventory and record-keeping systems to confirm, document, identify, and segregate compliant products and materials from non-compliant products and materials
- Making public all documents pertaining to compliance

Based on our RoHS Directive compliance program, Halter Technical certifies to you that to our best knowledge all products put on the market by Halter Technical on or after the date of this certification are in compliance with the RoHS Directive.

Sincerely,
Halter Technical LLC

Signed:
